Skills

- **Languages:** C, C++, Java, Python, PHP, JavaScript
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Django, Laravel, Next.js
- **Web Development:** HTML5, CSS3, Tailwind CSS, MERN Stack, Responsive Web Development
- **Mobile Development:** Android Studio (Kotlin, Java)
- **Databases:** MySQL, PostgreSQL, MongoDB, SQL, NoSQL
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Firebase, Vercel, Render, Canva, Figma, Stitch
- **AI & Developer Tools:** Windsurf, Claude, Antigravity, Trae, Blackbox
- **Core Concepts:** DSA, API Integration, UI/UX Fundamentals
- **Soft Skills:** Time Management, Leadership, Problem-Solving, Adaptability

WORK EXPERIENCE

FinMantra – Financial Lead Management Platform | Freelancer | LIVE Jul' 26

- Built a full-stack lead management platform using React.js, Node.js, Express.js, and PostgreSQL, enabling administrators to manage **10+ configurable settings,** API credentials and templates through a secure dashboard without redeployment.
- Integrated Meta Conversions API **(CAPI)** with Google Tag Manager **(GTM)** using server-side event tracking, browser-side dataLayer, SHA-256 hashing, and lead deduplication, improving conversion attribution accuracy for **100% of qualified leads.**
- Developed a dual-channel **WhatsApp OTP** system by combining the **Meta WhatsApp Cloud API** with a Baileys fallback gateway, ensuring reliable verification, instant lead notifications, and uninterrupted authentication even during primary gateway failures.

Tech stack: Next.js, React, TypeScript, FastAPI, Node.js, PostgreSQL, WebSockets, Gemini API.

ChatLeads AI – Automated Lead Intelligence & WhatsApp Fleet CRM | Freelancer | LIVE Jun' 26

- Architected a real-time WhatsApp CRM supporting **50+** concurrent sessions using Node.js, FastAPI, Baileys SDK, and WebSockets, enabling instant lead synchronization, live agent monitoring, and secure JWT.
- Automated document processing by integrating **Gemini 2.5 Flash for OCR** and **Llama-4 (Groq API)** for intelligent data extraction, reducing manual lead entry by **90%** while generating structured records from PDFs and images.
- Engineered a scalable multi-tenant backend with PostgreSQL, rate-limit handling, and Pandas/OpenPyXL-based Excel reporting, capable of processing 10,000+ leads with reliable performance.

Tech stack: Next.js, React, TypeScript, FastAPI, Node.js, PostgreSQL, WebSockets, Gemini API, Groq API, Pandas

Nexus – High-Performance Multi-Tenant CRM Platform | Freelancer | LIVE May' 26

- Engineered a multi-tenant CRM supporting **4 user roles** (SuperAdmin, Admin, TeamLead, Agent) using React.js, Node.js, Express.js, Prisma ORM, and PostgreSQL, enabling dynamic lead management and flexible CSV/Excel imports.
- Implemented real-time lead assignment and callback notifications with Socket.io, leveraged Redis for low-latency event handling, and integrated **Brevo SMTP** to automate appointment reminders and transactional emails for **1,000+ leads/day.**
- Optimized backend scalability through database indexing, chunk-based bulk imports **(1,000 records/batch)**, and efficient Excel export APIs, reducing processing time by **70%** while handling **100,000+** lead records.

Tech stack: Tech Stack: React.js, Node.js, Express.js, PostgreSQL (JSONB), Prisma ORM, Redis, Socket.io

ABV - SkillPort – Vocational Education & Institute Management Platform | Freelancer | LIVE Apr' 26

- Developed a **MERN-based** institute management platform using React.js, Node.js, Express.js, and MongoDB, automating admissions, student records, digital document workflows, and priority-based notices for **500+ students** and administrative staff.
- Implemented a JWT-secured certificate verification portal with unique digital IDs, while leveraging PDF-Parse to automate document processing, reducing manual verification effort by **40%.**
- Engineered RBAC dashboards for administrators, staff, and students, integrated Axios for seamless API communication, and delivered a production-ready solution that generated **₹1.1 lakh** in project revenue.

Tech stack: React.js, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, PDF-Parse, Axios, Git, GitHub

Internship

IFB Automotive – Gurugram, Haryana | CERTIFICATE Jul' 25

Junior Software Intern

- Contributed to web and AI-powered application development using Python, Django, HTML, and MongoDB, assisting in the implementation of scalable modules for business requirements.
- Collaborated with the development team to design, test, debug, and integrate application features while ensuring code quality, functionality, and smooth deployment workflows.
- Optimized data storage and retrieval by implementing efficient file-handling mechanisms, participated in requirement analysis, and gained hands-on experience with software development, testing, and team-based project delivery.

Projects

UniVerse – Digital Campus Dining Platform | Co-Founder | LIVE May' 26

- Built a full-stack campus dining platform serving **1,000+ students** and supporting **50+ vendors**, using React.js, Node.js, Express.js, and MongoDB for secure authentication, menu management, and real-time order processing.
- Integrated Razorpay with **HMAC SHA-256** verification for secure payments, implemented Socket.io for live order tracking, and automated customer and vendor notifications through **Telegram** and Firebase services.
- Optimized platform performance with Cloudinary for media storage, QR-based order verification, automated **T+1 vendor settlements**, reducing page load time by **40% and improving overall user experience.**

Tech stack: React.js, Tailwind CSS, Node.js, MongoDB, Socket.io, Razorpay, Firebase, Vercel, Render, GitHub

DarshanAI – Smart Pilgrimage & Temple Booking App | GITHUB (APK) Apr' 26

- Created a native Android application enabling temple bookings, passenger management, slot scheduling, and digital ticket history through an intuitive mobile interface.
- Incorporated OTP-based email verification, automated booking confirmations, QR-code e-tickets, and asynchronous operations using Kotlin Coroutines and JavaMail API.
- Delivered a polished user experience with Jetpack Compose, Material 3, dynamic themes, glassmorphism, and centralized state management for smooth performance.

Tech stack: Kotlin, Jetpack Compose, Android SDK, Kotlin Coroutines, JavaMail API, SharedPreferences, Material 3

CERTIFICATES

- Master Generative AI & Generative AI Tools (ChatGPT & More) - Udemy | **LINK** — Aug' 25
- Computational Theory: Language Principle & Finite Automata Theory - Infosys Springboard | **LINK** — Aug' 25
- Aptech Certified Professional in C/C++ Programming - Aptech Institute | **LINK** — Jun' 24
- JAVA PROGRAMIN - Lovely Professional university | IAMNEO Platform | **LINK** — May' 24
- Responsive Web Design - Free Code Camp | **LINK** — Sep' 23

EDUCATION

Lovely Professional University — **Punjab, India**
Bachelor of Technology - Computer Science and Engineering | **CGPE: 6.83** — Aug' 23 - Present

Daffodils Public School — **Fatehabad, Haryana**
Intermediate | **Percentage: 65** — Jun' 22 - Apr' 23

Crescent Public School — **Fatehabad, Haryana**
Matriculation | **Percentage: 67** — Jun' 20 - Apr' 21
